FROM

H. R. CROSTHWAITE, Esq., C.I.E., C.B.E.,

DIRECTOR OF INDUSTRIES,

*Central Provinces and Berar,*

TO

THE SECRETARY TO GOVERNMENT,

COMMERCE AND INDUSTRY DEPARTMENT,

*Central Provinces.*

*Nagpur, the 19th December 1921.*

SIR,

I have the honour to submit, herewith, the Report for 1920-21 on the Central Museum, Nagpur.

I have the honour to be,

Sir,

Your most obedient Servant,

H. R. CROSTHWAITE,

*Director of Industries,*

*Central Provinces.*

7. 2. 22

R 009.09(522) N M.

## Report of the Central Museum, Nagpur, for the year 1920-21.

### I.—FINANCE.

The opening balance at the credit of the Museum Fund on the 1st April 1920, was Rs. 5,055-9-9 (Appendix A). The donation made by Government for the year under report was Rs. 4,380; the amount credited into the Treasury during the year towards the Museum Fund came to Rs. 222-6-0, making the total receipts under all heads, Rs. 9,657-15-9.

The expenditure incurred during the year under "contingencies" amounts to Rs. 5,771-13-10, including salaries and travelling allowances of servants paid from the Museum Fund and contingencies. The year closed with a balance of Rs. 3,886-1-11.

The total expenditure on the salaries and allowances of the permanent staff, including allowances, was Rs. 3,019-14-11.

### II.—VISITORS.

The total number of visitors counted at the turnstile for the year was 109,113 (males 129,761 and females 69,354) against 151,923 during the previous year.

### III.—GENERAL ARRANGEMENTS, ETC.

During the year under report the geological and forest exhibits were arranged in the Central Hall, but later they were removed into the east room. The collection of mammals, fish and reptiles in the east room was brought into the Central Hall, with the exception of the reptiles which were placed in the bird room. For want of accommodation the textiles have been placed temporarily in the Central Hall as well.

It was found desirable to close the Museum building to the public on two days in the month for dusting and general cleaning up. The days selected were the 1st and the 15th of every month, and this measure was brought into force from November, after duly notifying the fact in local newspapers.

### IV.—ESTABLISHMENT.

The pay of the whole establishment has been revised.

## V.—BUILDING.

Important additions to the building are hoped for, but nothing can be done until money can be provided. The Museum is now overcrowded.

## VI.—ETHNOLOGICAL SECTION.

The ethnological collection of Gond exhibits made by Raj Bahadur Hira Lal in 1914, which consists of some 250 specimens, was placed on exhibition in the west wing of the building. Seven enlarged photographs of typical examples of the aboriginal tribes in the Central Provinces were also placed in the ethnological court.

Through the Director of the Forest School at Balaghat a number of ethnological exhibits, belonging to the forest tribes, were obtained and placed on exhibition.

A separate catalogue of all the ethnological exhibits in the Museum has been prepared, and photographs were taken of the Pola festival.

## VII.—ARCHAEOLOGICAL SECTION.

No new additions have been made to this section. An old muzzle-loading arm was presented by the Deputy Commissioner of Saugor, and some arms used by the forest tribes of the Central Provinces were obtained from the Forest School at Balaghat. A catalogue of all the arms and armour in the Museum has been prepared, and photographs taken of the Gond remains at Deogarh in the Chhindwara District.

A pamphlet on the Ashvi Inscriptions by the Coin Expert has been published.

## VIII.—GEOLOGICAL SECTION.

This section, as stated before, was removed from the Central Hall and now occupies the east room of the building, along with the forest exhibits. The whole collection has been relabelled with printed labels.

The Director of the Geological Survey of India was requested to arrange for the development of this section and in October deputed Mr. C. S. Fox, of the Survey, to draw up a scheme.

Under this scheme the arrangement of the collection is in 16 cases, as follows:—

Two cases to certain type minerals.

Two cases to certain type rocks.

Three cases to certain fossils.

Eight cases to certain economic substances as follows:—

(1) Manganese ores and associated minerals and rocks.

(2) Iron ores, ferruginous laterite and aluminous laterite (bauxite).

(3) Limestones, dolomite, soapstones, glass sands, kaolin.

(4) Orehres, fire-clay and coals.

(5) Agates, jaspers, amethyst, cornelian, garnets, mica.

(6) Gold, copper ore, galena, barytes, fluorspar, calcite, tin, wolfram.

(7) Ornamental building stones.

(8) Road metal, kunkur, Lonar lake salts.

One case, to help students, containing a set of crystal models and display of minerals illustrating hardness, structure, cleavage and lustre.

All these changes have been carried out except the supply of the last case, the proposed contents of which must be obtained from England and America. Fifty-one specimens of typical minerals and ten typical rocks were obtained from the Director of the Geological Survey, and the following additions made to the collection:—

Specimen	Locality
Tracolumite (flexible sandstone)	Third State.
Pink dolomite	Ramtek.
Dolomite	"
Pure granular dolomite	"
Kaolin	Balaghat.
Wood-ashyite in porphyritic basaltic rock	Beldanagri, Nagpur.
Piedmontite, with manganese ore	"
Trinitite	Paracool, Nagpur.
Galena	Ashtab, Nagpur District.
Fire-clay	Khatra, Nagpur.
Calcite	Nagpur.
Selenium.	"
A few inter-trappean fossils	Mandla.

A set of District Gazetteers has been obtained for use in this section.

## IX.—NATURAL HISTORY SECTION.

*Mammals.*—The collection was increased by 67 specimens and now includes a splendid series of the skins of wolves, wild dogs and jackals in various stages of growth and from all parts of the Provinces. They afford excellent material for study to anybody who has to recognise these animals before paying rewards for their destruction. A pamphlet on the differentiation of these animals has also been compiled. An important addition was the Gazelle-Antelope hybrid which was born and lived for some years in the Maltraj-bagh, where it was finally killed by a four-horned antelope which obtained access to its paddock. A lion cub, an otter, and a porcupine were also added to the collection.

*Birds.*—A large new case has been fitted up in the Bird Room of an improved type to match a similar case constructed the year previously. These cases show the contents to advantage and economise space. The following birds new to the collection were obtained during the year:—

Blue-tailed Bee-eater.  
Purple-rumped Sunbird.  
Large Indian Pratincole.  
Bombay Quaker Thrush.  
Southern Painted Partridge.  
Northern Rufous Woodpecker.  
Scaly-bellied Green Woodpecker.

The Museum is indebted to Mr. D. MacArthur, Irrigation Survey Division, Nagpur, for a collection of birds' nests and for the following local birds' eggs obtained from him by exchange of duplicates:—

Cost	In exchange for	Painted Snipe.
White-throated ground Thrush	do.	Pied Bunting.
Indian Wren-Warbler (white variety).	do.	
Indian Fly	do.	Brown Bunting.
Black-capped Flycatcher	do.	Indian Flycatcher.
Bay-backed Shrike	do.	Hoopoe.
Black Partridge	do.	Small Pheasant.
Rufous-fronted Wren-Warbler	do.	Syke's Crested Lark.
Brown Cuckoo	do.	Bleeding Heart Lark.
Red of Green Warbler	do.	Tinny Bush Quail.
Common Kingfisher	do.	Darky Egg Martin.

Eggs of the Blue-tailed Bee-eater have also been secured.

A group of Button Quails, Tickell's Flower-pecker with nest, and a Peacock have been mounted for the show cases.

*Ornithology.*—A lecture on Economic Ornithology was given by me to the final year students of the Agricultural College.

*Reptiles*.—The Typhlopidae (Burrowing snakes) in the Museum were sent for examination to Colonel Wall, at his request. He verified their identification and recognised a few specimens of *Typhlops porrostris* amongst them. The only other specimens of this species are in the British Museum.

A set of local poisonous snakes was lent to the Robertson Medical School for lecture purposes, and a set of ten named snakes was presented to the Museum of the same institution. I also verified the identification of the snakes already in their possession.

A green Viper (*Lachesis graminea*) from Pachmarhi and a large Russell's Viper (*V. Russellii*) were added to the collection and a small crocodile (*Gavialis gangeticus*) and an agamoid lizard (*Chrotoria blanfordiana*) mounted for exhibition.

*Fish*.—Local loaches and a collection of local mosquito larvicidal fish were added to the collection.

*Mollusca*.—The collection of local mollusca was relabelled with printed labels and the collection enlarged.

A diagram of an ideal mollusc was introduced into the show case.

*Reptiles*.—Some additions during the year were an exceptionally large tree snake (*Trop. prater*), a chameleon, a green tree snake and a cobra from Betul. The large Russell's Viper, which had lived in the vivaria for the last six years, died. The present position of the vivaria is not ideal for housing reptiles, and great care is necessary during the warmer and colder months.

## X.—ENTOMOLOGICAL SECTION.

The Insect Gallery was increased by six compartments depicting named local forms of Coleoptera and Lepidoptera with descriptive labels. The families Pieridae, Lycaenidae, Hesperidae, Arctiidae, Amalidae, Noctuidae, Sphingidae and Saturniidae of the Lepidoptera and Scarabaeidae of the Coleoptera were dealt with.

Three compartments illustrating lepidopterous and coleopterous pests were also added. All the Sphingidae (Hawk-moths), Uramidae, Geometridae, Hypsidae and Lymantriidae in the Museum were identified by me and labels prepared for the Sphingidae, Arctiidae, Scorpions, Solifugae and Araneae (Spiders). Labels have also been prepared for the Hemiptera and a number of these insects identified.

The following insects were sent to specialists in Europe for identification and return. —

Two consignments of Carabidae to Mr. H. E. Andrews (both returned). Curculionidae, Erotylidae, Endomychidae and Ruelini to Messrs. Marshall and Arrow at the British Museum (not yet returned). Histeridae to Muns. Desbordes of Paris. The latter named all but one of the specimens sent to him and also presented us with a number of specimens.

I identified a number of Dragon-flies and Noctuids while at Pusa during the 4th Entomological Meeting.

The Imperial Entomologist visited the Insect gallery in December and expressed his approval of the exhibits on display.

The cabinet collection has been increased.

#### XI.—INDUSTRIAL AND ECONOMIC SECTION.

A move was made to improve this section in commercial lines and manufacturers of local industries were asked to advertise their wares in the Museum. The larger firms took advantage of this, e.g., the Tapt Mills at Bichanpur sent 29 samples of mill-woven cloth, the Perfect Pottery Works, Jubbulpore, sent 31 exhibits of their pottery. The manufactures of minor village industries were naturally unwilling to exhibit their wares and several of these have been purchased and placed on exhibition. Noteworthy are the hand-woven cloths from Damoh and the dyed cloths from Sohagpur.

The specimens of leather, silk and cotton fabrics, scabbings, waxes and tobacco, were relabelled.

*Tours.*—I was on deputation from the 13th to 30th January as taxidermist to His Royal Highness the Duke of Connaught. In February I attended the meeting of the Board of Agriculture (Entomological Section) held at Pusa and also paid a visit to the Lucknow Museum.

A collecting trip was made to the Balaghat District in March. The Coin Expert visited Deoghat, District Chhindwara, and brought photographic negatives of the old Gond buildings.

E. A. D'ABREU,

*Curator Central Museum,*

*Nagpur.*

## APPENDIX A.

*Receipts and charges under contingencies, including servants paid from contingencies and T. A. under the same head during the year ending 31st March 1921.*

Details.	Actuals.	Total.	Remarks.
<i>Receipts.</i>			
Opening balance on 1st April 1920	9,657 0 0	—	
Allotment for 1920-21.	2,280 0 0	—	
Amount credited by Treasury	112 0 0	—	
		9,657 12 0	
<i>Expenditure.</i>			
Miscellaneous and other contingent expenditure, including salaries and T. A. of servants paid from contingencies.	3,771 15 10	3,771 15 10	
		3,886 1 11	Balance on 31st March 1921.

## APPENDIX B.

*Statement showing the number of coins received in the Central Museum, Nagpur, for the Coin Cabinet during the year ending 31st March 1921.*

Donors.	Gold.	Silver.	Copper.	Billon.	Lead.	Mixed metal.	Total.	Remarks.

## REPORT OF THE CENTRAL MUSEUM, NAGPUR, FOR THE YEAR 1921-22

---

### I.—FINANCE.

The opening balance at the credit of the Museum on the 1st April 1921, was Rs. 3,886-1-11 (Appendix A). The donation made by Government for the year was Rs. 2,953-0-0, the amount credited into the Treasury was Rs. 118-2-0 bringing the total to Rs. 6,957-3-11.

The expenditure incurred under "contingencies" amounts to Rs. 3,223-5-1, including salaries and travelling allowances of servants and contingencies. The year closed with a balance of Rs. 3,733-14-10. The total expenditure on the salaries and allowances of the permanent staff was Rs. 4,306-7-1.

### II.—VISITORS.

The total number of visitors counted at the turnstiles for the year was 218,627 (males 151,172 and females 67,455) against 199,115 in the previous year. The Curator of the Patna Museum was a visitor on the 25th and 26th March 1922.

### III.—GENERAL ARRANGEMENTS

During the year the building was fitted with electric lights and fans. The old industrial and art section was overhauled and a number of useless exhibits removed. The ethnological collection of Gond articles was removed from the west wing into the central hall and the textiles were re-arranged in the west wing.

### IV.—BUILDING.

Plans have long been ready for the extension of the building. A room 60' X 30' is wanted for a commercial section and emporium. This will help the other sections in the Museum to develop.

### V.—ARCHAEOLOGICAL SECTION.

The most important addition to this section was an inscribed wooden pillar 12½ feet long found in the bottom of a tank at Kirari in the Chandrapur Zamindari of the Bilaspur

district. The type of letters used in the inscription fixes its date between the 1st and 3rd centuries A. D. A copy of the inscription made by a pandit at Kirari when the pillar was first found has been obtained, but when the Coin Expert went to Chandrapur to treat the pillar and to bring it away he found only about a foot of the inscribed portion left on it. While at Chandrapur the Coin Expert also procured through Mr. L. P. Pandaya of Bālpur two old iron spears exposed by the cutting away of the bank of the Mahanadi. Mr. Pandaya has presented an old stoneware drinking vessel and two minute gold rings (*bal mumaṣ*) found in the Mahanadi.

A copper plate in two parts belonging to the period of the Haihaya-vantai kings was received from the Deputy Commissioner, Raipur, and is being described by Rai Bahadur Hiralal in *Epigraphia Indica*.

In accordance with the Local Government's orders seven Jain images which have been many years in this section were given to the Jain community. These were removed with much ceremony on the 3rd October 1921.

**Numismatics.**—The collection in the coin cabinet was increased by 144 coins received from various sources as detailed in Appendix B. A descriptive list of the coins—Appendix C—has been prepared which includes a number of unique and rare coins, viz. Nos. 3 to 6 and 12 to 15, of part I, and Nos. 6, 35, 43, 49, 102 and 103 of part III.

## VI.—GEOLOGICAL SECTION

The collection of mineral types—the economic minerals, the rocks and the fossils were re-numbered and catalogued. A fine specimen of stalactitic limestone was obtained from Ramtek, and a few additions made of coal, copper-ore from Betul, manganese, etc. A few echinoderms from Dwaraka were presented. Many of these exhibits were provided with new labels.

**Metals.** H. F. Cook and Sons, Katni, sent samples of limestones and bauxites for exhibition and Olypherts, Paints and Products Limited, Katni, sent 16 samples of their metallic paints.

## VII.—ZOOLOGICAL SECTION

**Mammals.**—The black ape which was one of the great attractions in the Maharaj Bagh menagerie died and has been mounted and given a place in the mammal gallery. A good specimen of a four-horned antelope was added.

**Birds.**—Two groups of herons and rails amongst natural surroundings have been prepared and placed on exhibition and the following birds new to the collection have been obtained:—

Steppe Eagle.  
Bonelli's Eagle.  
Lesser Florican.  
Night Heron.  
Flamingo.

The egg collection was re-labelled and has been improved chiefly by exchange through the energies of Mr. D. MacArthur. New clutches to the collection are as follows:—

Tickle's Flower-pecker.  
Indian Sand Martin.  
Rufous-bellied Babbler.  
White-browed Bulbul.  
Pied Kingfisher.  
Black-headed Oriole.  
Indian Pitta.  
Purple Moorhen.  
Coot.  
Black Partridge.  
Peafowl.  
Rock horned Owl.

A hand-list of the birds of the Central Provinces is in preparation and a bird calendar for the Central Provinces is desired by local bird-lovers, one of whom has supplied considerable data from four central districts.

**Reptiles and Fish.**—A chart showing how to tell whether a snake is poisonous, and a mounted specimen of the fish *Pangasius bichanani* from the Mahanadi have been introduced into the galleries.

The cabinet collection of specimens in alcohol has been overhauled and systematically arranged in a dark corner at one end of the work room.

## VIII.—ENTOMOLOGICAL SECTION.

The insect gallery was increased by seven compartments depicting named local forms of diptera, rhynchota, and arachnida. The cases devoted to rhynchota dealt with land and aquatic bugs and also plant lice with representations of the

families *Pentatomida*, *Coccidae*, *Lygaeidae*, *Hydrometridae*, *Belontiidae*, *Reduviidae*, etc. The case devoted to the phytophthires shows plant lice, scale insects and also the lac insect.

A preparation showing the terminology of the hard parts of a bug and diagrams showing the venation of an ideal insect's wing and of a lepidopterous wing have also been added.

The gallery has also been enriched by coloured plates showing pests of the cotton, rice and wheat plants and other lepidopterous pests.

The display of the arachnida consists of local scorpions, typical spiders and the salifuge. Only one consignment of insects was sent out to specialists for identification, but two were received which had been sent out in previous years. The cabinet collection has been increased and most of the scorpions in the Museum have been identified.

#### IX.—INDUSTRIAL AND ART SECTION.

Much time had to be devoted to this section this year. The whole collection has been re-catalogued, re-labelled and re-arranged, a large number of useless exhibits weeded out, but it is still far from satisfactory. It is hoped that when a new room has been added to the building all specimens of commercial importance will be removed from this section which could then be entirely devoted to ethnology, art and archaeology.

The changes at present effected consist chiefly of bringing together articles of a like nature and their correct labelling.

One case has been arranged with local pottery and another devoted only to exhibits from the potteries of Jubbulpore. Another case contains lacquered ware with a model of a lac factory showing the various processes gone through. Another case contains agricultural models. The wood carvings and stone work have been removed to one end of the room and have been labelled.

The gold and silver work has been brought together and labelled and the same has been done with all the musical instruments which now occupy a bay in one of the central cases.

#### X.—ECONOMIC SECTION.

The timber specimens and the fibres have been sorted out and short descriptive labels have been added to the former. Through the Director of Agriculture 49 samples

of typical agricultural products of the provinces and also 21 samples of local fodder, thatching, and oil-producing grasses were received.

It is hoped shortly to have all local forest products on exhibition.

## XI.—EMPORIUM

An emporium for the exhibition and sale of cottage industry products was opened in May in the central hall. No funds were available for the purchase of suitable show-cases but some miscellaneous cases not in use were assembled and used to the best advantage. The arrangement is not satisfactory as many goods cannot be displayed but have to be hidden away, so that the visitor does not gain a correct impression of the quantity and variety of the goods stocked.

The object of this emporium is to increase the sale of village products, not only to the extent that goods can be sold there but by introducing new lines and new makers to shop-keepers and those in a position to buy in large quantities. This aim has been achieved, several dealers in Nagpur now stock new lines as a result of what they have seen in this emporium. A directory of cottage manufactures giving the names and addresses of the makers has been compiled and is being printed. It is hoped this will increase the trade in these goods.

## XII.—EDUCATIONAL.

The following sets of specimens were given free of charge to other institutions or school museums for educational purposes :—

- (1) A set of 20 named minerals and rocks to St. Joseph's Convent High School, Nagpur.
- (2) A set of six mounted birds to the Normal School, Raipur.
- (3) A set of two mammals, nine birds, one reptile and one fish to St. Marys' High School, Mhow.
- (4) A set of 34 birds and two mammals to the Deputy Chief Scout, Boy Scouts' Association, for demonstration work to scout-masters.

At the request of the Deputy Chief of the Boy Scouts' Association a lecture was given in July to a party of scout-masters on the birds of the Central Provinces. How to

recognize poisonous snakes and disease-carrying flies was demonstrated by means of specimens to a few students of the Robertson Medical School in March. A party of school-boys from Akola were taken round by the Coin Expert in October. As usual a number of animals, chiefly reptiles and mammals, have been sent to the Museum for identification.

**Tours.**—Collecting trips were made in the Bhandara and Hoshangabad districts and the Pendra Zamindari during the winter months. The Coin Expert also toured in Chandrapur Zamindari, Raigarh State, and visited Hoshangabad and Bilaspur in connection with archaeological work.

M. A. SUBOOR,

*Officiating Curator.*
